

In-TAC ISSofBC Pre-Arrival Services Job Posting

Senior Software Developer

Job ID #: In-TAC-030-16

Sector: IT

Job Type: Full time

Location: North Vancouver, BC

Number of Openings: 1

Salary: DOE (Depends on experience)

Closing Date: Ongoing until filled

As Senior Software Developer, you will develop, deploy, analyze, utilize, and maintain software, tools, applications, and information systems as required by the company in order to meet the business requirements of the company in a demanding global marketplace. Additionally, provide proven leadership and strong support to a busy software development team in a challenging business environment.

Who you are: you're a driven, experienced developer who is able to get started quickly on new projects. You're an effective communicator who understands the role that business plays in software development. While you still enjoy learning, you are also motivated to help others. People come to you because they respect you as a professional and value your opinion. If you see a problem, you're proactive in finding a solution. When it comes to your team's productivity, you are committed and highly accountable. You recognize the need for quality, and you take ownership of the end product along with your team. For you, complex problems are not intimidating but rather puzzles to be solved. You want to work with a team who values your contribution, and will help you succeed in your ambitions.

Responsibilities

- Create, develop, support, maintain, and extend a comprehensive ERP software system by mastering a variety of tools, platforms, and techniques under the direction of the Manager, Software Developers.
- Act as the lead programmer on highly complex, difficult and challenging programming issues in which there is significant business return and/or risk
- Improve team dynamic, facilitate team efficiency, and ensure team success by working closely with the team in leadership, supervisory, project management, and team lead roles as required.
- Provide high levels of service to a diverse user base and team members alike by delivering strong, effective solutions and communicating clearly.
- Assist other members of the team by engaging in close-up evaluation of technical details, providing comprehensive analysis of business requirements, and participating in the group decision-making process.
- Contribute to a team development effort by enforcing clearly-defined methods and standards, accurately documenting work results, and working in close coordination with various team associates.
- Succeed in a fast-paced, demanding work environment and meet strict delivery deadlines by utilizing effective time management, task prioritization, and multi-tasking abilities while working in complex, high-risk areas
