Software Developer I

Job ID #: In-TAC-032-16
Sector: IT
Job Type: Full time
Location: North Vancouver, BC
Number of Openings: 1
Salary: DOE (Depends on experience)
Closing Date: Ongoing until filled

Software Developer I, you will develop, deploy, analyze, utilize, and maintain software, tools, applications, and information systems as required by the company in order to meet the business requirements of the company in a demanding global marketplace.

Who you are: You're a strong self-starter who is eager to learn more on the job. You're the type of person who picks up new concepts quickly, while knowing when to request further clarification if you encounter a roadblock. When it comes to your team's productivity, you recognize the need to deliver on your commitments. You take ownership of your work and you're dedicated to quality. For you, complex problems are not intimidating but rather puzzles to be solved. You want to work with a team who values your contribution and will help you succeed in your career.

Responsibilities

- Support a comprehensive ERP software system by using specific programming languages, tools, and techniques
- Investigate and fix software bugs
- Deliver effective and robust low to medium complexity enhancements that meet business and technical requirements
- Understand software requirements in technical specifications by efficient analysis of business systems, software source code, data patterns, and existing documentation
- Reliably communicate and follow through with stated deadlines and estimates
- Ensure high level of software quality by testing own code thoroughly and collaborating with QA in development of test cases
- Contribute to a team development effort by adhering to clearly-defined methods and standards
- Succeed in a fast-paced work environment by utilizing effective time management and task prioritization abilities

Qualifications (required)

- Relevant Computer Science diploma or degree
- Experience with the following technologies: Microsoft Visual Studio, Microsoft .Net, Microsoft SQL Server, Transact-SQL
- Experience with a software version control system
- Excellent command of English language
- Excellent written and spoken communication skills

Qualifications (assets)

Experience with the following: VB.NET or C#.NET; Git, SourceTree, BitBucket, Crucible; A CD tool, like Bamboo; JIRA, TestRail; SSRS, Crystal Reports; Agile Methodology
