Software Developer II

Job ID #: In-TAC-033-16
Sector: IT
Job Type: Full time
Location: North Vancouver, BC
Number of Openings: 1
Salary: DOE (Depends on experience)
Closing Date: Ongoing until filled

Software Developer I, you will develop, deploy, analyze, utilize, and maintain software, tools, applications, and information systems as required by the company in order to meet the business requirements of the company in a demanding global marketplace.

Who you are: you're a driven, experienced developer who is able to get started quickly on new projects. You're an effective communicator who understands the role that business plays in software development. While you still enjoy learning, you are also motivated to help others. People come to you because they respect you as a professional and value your opinion. If you see a problem, you're proactive in finding a solution. When it comes to your team's productivity, you are committed and highly accountable. You recognize the need for quality, and you take ownership of the end product along with your team. For you, complex problems are not intimidating but rather puzzles to be solved. You want to work with a team who values your contribution, and will help you succeed in your ambitions.

Responsibilities

- Support a comprehensive ERP software system by using specific programming languages, tools, and techniques
- Design and implement strong software solutions by efficient analysis of business processes and software source code
- Assist more junior members of the team through mentorship and engaging in close-up evaluation of technical details
- Investigate and fix software bugs
- Deliver effective and robust low to medium complexity enhancements that meet business and technical requirements
- Reliably communicate and follow through with stated deadlines, while displaying a high degree of professionalism and independence
- Ensure high level of software quality by testing own code thoroughly, collaborating with QA in development of test cases, and conducting insightful code reviews for other software development team members
- Contribute to a team development effort by adhering to, and helping to improve, clearly-defined methods and standards
- Succeed in a fast-paced work environment by utilizing effective time management and task prioritization abilities

Qualifications (required)

- Relevant Computer Science diploma or degree
- 3+ years of experience as a software developer with proven high-quality results
- Experience with the following technologies: Microsoft Visual Studio, Microsoft .Net, Microsoft SQL Server, Transact-SQL
- Experience with a software version control system
- Excellent command of English language
- Excellent written and spoken communication skills

Qualifications (assets)

Experience with the following:

- VB.NET or C#.NET
- Git, SourceTree, BitBucket, Crucible
- A CD tool, like Bamboo,
- JIRA, TestRail,
- SSRS, Crystal Reports
- Agile Methodology
